ELEMENT	GOALS	STATUS	UNGC ALIGNMENT	UN SDG ALIGNMENT
Environmental Impact	• Complete three projects per country where we have manufacturing operations to drive increased plastics circular economy by the end of 2025	<div></div>	7,8	12
	• Achieve a 28% reduction in absolute Scopes 1 and 2 GHG emissions by the end of 2030	<div></div>	7,8,9	13
	• Achieve a 15% reduction in absolute Scope 3 GHG emissions by the end of 2030	<div></div>	7,8,9	7,13
	• Reduce our water use intensity by 30% in all extremely high-stress geographies where we manufacture products by the end of 2030	<div></div>	7,8,9	6
	• Achieve 100% avoidance of waste to landfill by the end of 2030	<div></div>	7,8	12
	• Reduce COD or BOD by 10% from our wastewater discharge by the end of 2030	<div></div>	7,8	6
Biodiversity Protection	• Engage with an NGO partner to identify any endangered species impact by agricultural operations from which we source raw materials by the end of 2022	<div></div>	7,8,9	15
	• Assess agricultural biodiversity risks for priority crops and sourcing regions by the end of 2023	<div></div>	7,8,9	15
	• Identify local partners and engage in projects to have a net positive impact on any endangered species impacted by our supply chain by the end of 2025	<div></div>	7,8,9	15
	• Implement biodiversity conservation programs in all crop sourcing areas located in biodiversity hotspots by the end of 2025	<div></div>	7,8,9	15
	• Achieve zero deforestation, or 100% sustainable use of forest-based resources, by the end of 2030	<div></div>	7,8,9	15

# Raising our standards by transforming how we look at materiality

In October 2023, Ingredion began the process of moving from a traditional sustainability materiality assessment to a double materiality assessment that is in line with the requirements of the European Union’s Corporate Sustainability Reporting Directive (CSRD) double materiality assessment.\* The CSRDs double materiality assessment requires companies to consider both the financial impact of sustainability issues on their business (financial materiality) and the impact of their activities on people and the planet (impact materiality).

Across 2024, we conducted evaluations with internal and external stakeholders, reviewed inputs and outputs with our executive team and engaged consultants to help us navigate the complexity of EU CSRD requirements. Our stakeholder groups include customers, industry non-government organizations (NGOs), investors and suppliers. Additionally, we continue to conduct gap assessments against standards such as the Sustainability Accounting Standards Board (SASB), CDP, EcoVadis and Sustainalytics, to name a few.

Our double materiality work will continue into 2025 as we prepare for anticipated reporting under CSRD in 2028 for 2027 data. We have engaged Deloitte to assist us in this process. We will identify reporting needs and deploy digital solutions in support of enhanced data governance. We also expect to gain further insight on best practices as some companies begin to report on CSRD requirements. It should be noted that we report on many topics in this report. While some of them do not rise to the level of materiality to our business, they are there to help address the information needs of our stakeholders.

\*The inclusion of information in this report should not be construed as a characterization or an admission regarding the materiality or financial impact of that information for purposes of U.S. securities law. For additional information regarding Ingredion, please see our current and periodic reports with the Securities and Exchange Commission, including our Annual Reports on Form 10-K and Quarterly Reports on Form 10-Q.
